

Thank you for having one of our takeaway painting kits.

Just a few simple things, then off you go!

- 1) If there is any dust on the ceramic item, wipe it down with a damp sponge (making sure the sponge is not too wet).
- 2) Paints – the colour chart (online) shows the colour after glazing and firing. Apply 2/3 coats for best results.
- 3) The paints supplied are for specific use on ceramic items, please do not use any other paints (especially if you want the item glazed and fired).
- 4) Wash brushes in water and dry on kitchen towel to prevent the next colour running.
- 5) Don't paint light colours over dark
- 6) Please wash your hands before and after use

When you have finished your masterpieces, let them dry thoroughly then place them safely away. Once we re-open you can bring the item in, we will fire and glaze it.

Email us a picture of you painting at home, we will add them to our website!

Have lots of fun !!
